Inventor and Applicant Intake

November 10, 2026

DRAFT

CONTENTS

Inventor and Applicant Intake

1. Proposed application

2. Inventors

Inventor 1

3. Applicant and ownership

4. India residency and Section 39

5. Public disclosures

6. Prior filings and patent searches

7. Best mode and implementation evidence

8. Commercial and technical scope

9. Declarations

DRAFT

CONFIDENTIAL

Inventor and Applicant Intake

Do not file until every section is completed and reviewed by patent counsel.

1. Proposed application

- Title: Lag-Aware Advisory Digital Twin for Diagnosing Blast-Furnace Production Shortfalls
- Desired first filing jurisdiction: `[India / United States / Other]`
- Desired filing type: `[Provisional / Complete / Nonprovisional / PCT]`
- Target filing date: `[DATE]`

2. Inventors

For each person who contributed to conception of at least one claimed feature:

INVENTOR 1

- Full legal name:
- Residence city, state, country:
- Citizenship:
- Postal address:
- Email and phone:
- Employer at conception date:
- Employment/IP-assignment agreement:
- Specific conception contribution:
  - ☐ target-conditioned Golden Bands
  - ☐ furnace-specific lag attribution
  - ☐ sensor-anchor reconciliation
  - ☐ derivative-preserving saturation
  - ☐ causal decision-model separation
  - ☐ Mahalanobis envelope/trust gate
  - ☐ five-ceiling arbiter
  - ☐ capability/evidence classifier
  - ☐ cryptographic audit/execution split
  - ☐ other:

DRAFT

CONFIDENTIAL

- Date contribution was conceived:
- Supporting evidence (notebook, commit, message, diagram):

Repeat for every inventor.

3. Applicant and ownership

- Proposed applicant legal name:
- Applicant type: `[natural person / company / startup / university / employer]`
- Registered address:
- Country of incorporation/residence:
- Basis of right from inventor: `[inventor / assignment / employment agreement]`
- Existing assignment documents:
- Government or sponsored-research interest:
- Open-source or third-party obligations:

4. India residency and Section 39

- Is any inventor or applicant resident in India? `[yes/no]`
- Was the invention conceived in India? `[yes/no/partly]`
- Has any Indian application already been filed? `[number/date/no]`
- If filing outside India first, has Form 25 foreign-filing permission been obtained? `[number/date/no]`
- Has six weeks elapsed from an Indian first filing without a secrecy direction? `[yes/no/not applicable]`

5. Public disclosures

List every disclosure, including:

DRAFT

CONFIDENTIAL

Date	URL/event	Person who disclosed	Exact subject disclosed	Public/private
10 Nov 2026	GitHub repository	[NAME]	Code, architecture, demo, patentability discussion	Public
10 Nov 2026	GitHub Pages	[NAME]	Interactive product and pitch	Public
[DATE]	Cloudflare demo	[NAME]	Full-stack live demonstration	Public

Also list:

- customer demos;
- emails or proposals without NDA;
- conference talks;
- sales offers;
- pilot proposals;
- papers, theses, or blog posts;
- social-media posts;
- source-code repositories and commit hashes.

6. Prior filings and patent searches

- Any earlier provisional, Indian, PCT, or foreign filing:
- Any patent-search report:
- Known relevant patents beyond the package matrix:
- Any communication with a patent attorney/agent:

7. Best mode and implementation evidence

- Best currently known operating-band cohort definition:
- Best lag kernel and time constants:
- Best sensor-anchor method:
- Best soft-saturation form and softness:
- Best envelope threshold and trust region:
- Best physical ceiling set:

DRAFT

CONFIDENTIAL

- Best model family and validation method:
- Production examples and test results:
- Code commit implementing each:

8. Commercial and technical scope

- Target furnace types/sizes:
- Intended customer plants:
- Intended deployment (DMZ/on-prem/cloud):
- Sensors required:
- Alternative industrial reactors:
- Competitors and products discussed with customers:
- Features essential to commercial differentiation:

9. Declarations

- ☐ Every named inventor reviewed the specification.
- ☐ The best method is disclosed.
- ☐ No inventor was omitted for administrative convenience.
- ☐ No contributor who merely implemented another’s conception was added as inventor without analysis.
- ☐ Ownership and employer obligations were reviewed.
- ☐ All public disclosures were disclosed to counsel.
- ☐ All known material prior art was disclosed to US counsel for IDS preparation.
